Pierre Courteille

Cloud Architect - DevOps

AWS • DevOps • CDK • Terraform • SaaS • Multi-Account (Organizations) • 4× AWS Certified

(+33) 6 08 04 22 44 | pierre.courteille@gmail.com

LinkedIn | Geneva, Switzerland

Summary

AWS cloud and DevOps engineer (four certifications): design, migration, and optimization with emphasis on security, scalability, and performance. CI/CD and infrastructure-as-code (CDK, CloudFormation, Terraform); production platforms on EKS, ECS, Lambda, RDS, and core networking and identity.

At a glance: 8+ years • 20+ clients • security, performance, scalability, robustness • complex work blending cloud and mathematical optimization.

Experience

Cloud Engineer — Qim info / International Electrotechnical Commission (IEC)

Geneva, Switzerland • Hybrid | *Oct 2025 – Present*

Design and operation of multi-account AWS environments for several applications, with emphasis on security, scalability, and automation.

- SaaS architecture (Silo model): multi-tenant design (1 tenant = 1 AWS account) via AWS Organizations; strong isolation (network, IAM, data) and reduced blast radius
- Multi-account governance & security: account structure (OUs, SCPs), centralized governance, least privilege, secure cross-account access
- IaC & delivery: AWS CDK platform to deploy Docker microservices on ECS Fargate; automated tenant onboarding and standardized deployments
- Observability (multi-account / multi-region): centralized stack with CloudWatch OAM and dedicated monitoring account; Grafana, centralized logs/metrics, alerting (CloudWatch, SNS), synthetic monitoring
- Operations & optimization: VPC management, WAF on CloudFront, EC2 → ECS migrations, log analysis (Athena, Logs Insights)

Stack: AWS, AWS Organizations, CDK, Terraform, ECS Fargate, Docker, CloudWatch, Grafana, WAF, Athena, Python

Cloud Engineer (freelance) — Premaccess

Paris, France • Hybrid | *Jun 2019 – Sep 2025*

Support for multiple clients on AWS cloud transformation: migration through optimization and scale-out, with strong automation, security, and performance focus.

- Cloud migration & scalability: led migrations and continuous architecture improvements — ECS, EKS, serverless (Lambda, API Gateway), managed data (RDS, DynamoDB, Redshift, ElastiCache)
- Network & security: multi-AZ VPC (public / private / isolated subnets); Security Groups, NACLs, VPC Endpoints; IAM Identity Center, SCPs; KMS encryption
- CI/CD & IaC: CodePipeline, CodeBuild, GitLab CI, Jenkins; CDK, CloudFormation, Terraform
- Observability & FinOps: CloudWatch, X-Ray, Config, Security Hub; FinOps dashboards (Budgets, CUR, Cost Explorer)
- Automation & performance: internal provisioning tool (Python, Boto3); C# refactor (+40% throughput, –30% latency); serverless with AWS SAM; L2/L3 support and architecture reviews

Stack: AWS, Python, Node.js, .NET Core, Docker, Kubernetes, CDK, Terraform

.NET Instructor & Software Engineer (freelance) — ISIKA

Paris, France • Hybrid | *Mar 2020 – Apr 2023*

C# and .NET training with a focus on OOP and application design.

- Technical training: C# fundamentals, OOP (classes, inheritance), desktop development (WinForms)
- Application development: guided learners through full apps including data persistence (LINQ, Entity Framework, MySQL)
- Pedagogy: project follow-up and skills development through to assessed deliverables

Stack: C#, HTML5, Entity Framework, LINQ, MySQL, WinForms

Software Quality Assurance Manager — Bassetti

Kolkata area, India • Full-time | *Feb 2016 – May 2018*

Built and led a QA organization in India: team leadership, large-scale test automation, and DevOps practices.

- Hiring & leadership: recruited, trained, and led 25+ QA engineers, scaling test capacity for product growth
- Automation & tooling: co-designed an internal platform executing 10,000+ API tests/hour, improving coverage and efficiency
- Quality & delivery: close collaboration with development; automated feedback loops and daily tests, shorter regression cycles
- Process & DevOps: introduced DevOps practices, stronger QA–dev collaboration, faster release cadence

Stack: C#, .NET, Selenium, Jenkins, APIs, XML, Excel

Optimization Engineer — Kronos Incorporated (Ad Opt)

Montreal, Canada | *Jan 2015 – Jan 2016*

Ad Opt (Kronos) — optimization for airline crew planning (cost and operational efficiency).

- Algorithmic optimization: performance gains via column generation and shortest-path strategies on large problem instances
- Validation: intensive testing on thousands of instances for reliability in production-like conditions
- Production: customer deployments and integration support
- R&D: presentations at GERAD; contribution to scientific publications

Stack: C, C++, Linux, GDB, Git

Certifications (AWS)

- AWS Certified Developer – Associate (DVA-C02) — issued Jul 2025, expires Jul 2028
- AWS Certified DevOps Engineer – Professional (DOP-C02) — issued Jul 2025, expires Jul 2028
- AWS Certified Solutions Architect – Associate (SAA-C03) — issued Jul 2025, expires Jul 2028
- AWS Certified Cloud Practitioner (CLF-C02) — issued Jun 2025, expires Jul 2028

Education

- Master's, Mathematics & Computer Science (*MOCA* — modeling, optimization, combinatorics, algorithms) — Université de Montpellier — 2012–2015
- Bachelor's, Mathematics & Computer Science — Université de Nantes — 2009–2012
